MAY DAY THERE AND HERE. Anarchy meddled with Honest Labor yes

erday in European cities, and there were May Day scenes of bloodshed in Lyons, in Rome, in Florence, in Naples, in Fourmies and in other towns. Soldiers were called out, swords flashed in the air, volleys of bullets were poured into seething masses of raging humanity in the public streets.

Of course the police and military won in all the conflicts. They represented Government law and order. They were organized forces sent against miscellaneous bands o men who had been incited to violence through the effect upon feelings already strained by discontent of words of inflammatory speakers That the law triumphed, however, take nothing from the deplorable nature of the day's events, for the victory cost human lives and blood. The old festival Queen o the May was dethroned. Civil conflict reigned in her place.

In our own country Labor had also its demonstrations, and strikes were instituted which may lead to serious complications in mining and other industries; but no actual breaking o the public peace occurred and there wa no spilling of blood nor loss of precious lives. That this is so is due in not a small degree to the pronounced freedom accorded here to all men to think and organize and assemble as they will. They are unoppressed by the stern watchfulness and unhampered by the sterner restrictions to which monarchies and semimonarchies, ever suspicious because ever unjustifiable in principle, are compelled to resort for their own maintenance.

PARK CONCERTS.

The first of the evening concerts for the people was given in Battery Park last night. The more there is of this class of entertain ment for the people the better. The attend ance proves most strongly the appreciation Band nights.

What can be more recreating for mer than to go to this lovely open space, carpeted with soft grass, and to sit there restfully, the air freshening them with salty breath, and music, gay, intelligible music, soothing and exhilarating them ? If the habitues of the Metropolitan's boxes could gather such pleasure from their expensive opera as the people derive from their open air concerts said to be the cidest Union seldler in the country. the Metropolitan's boxes could gather such people derive from their open air concerts on Summer evenings they would deem it

cheaply bought. Give the people liberally of this clean, wholesome recreation. It is their due They go back to their homes with lighter hearts and sleep comes more quickly to their contented souls. The city need grudge no moneys spent on such popular benefits as these evening park concerts,

The Grand Jury in its presentment on the sondition of the city prisons scored the Essex Market Jail as simply unfit for the incarceration of human beings. The filthy condition of Essex street itself also came in for a well-merited scoring. Dirt, refuse matter, putrescent vegetables and the multiform loathsomeness of that street compelled these severe strictures.

If the Grand Jury would only patrol several other streets they would find that Essex is not beyond its filthy rivals. Such presentment may stir up desire for remedy. Cleanliness is the only antidote, and the Street-Cleaning Department should procure it. "Grave censure from a source like this" ought to goad on to some reform. Is the Street-Cleaning Department hopelessly given over to inactivity? Let the Grand Jury repeat itself in such presentments and it prevents abuses from taking deep

Four young girls perished in the fire which broke out in a fire-works factory. The combustion of the shop was so rapid that escape was impossible for them. The proprietor showed admirable bravery in his efforts to rescue the unfortunate girls. The claim that only non-explosives were used seems somewhat doubtful. If such ghastly culamities led to increased wa chfulness in similar surroundings there would be this benefit at least. But are people made any more prudent by these horrors?

The urgent advocacy of THE WORLD for the conversion of Rutgers slip from a dumping ground for old trucks and debris into a park, where children may play and their elders may freely breathe, has secured this desired result. Good! The crowded Seventh Ward now has one breathing space. It will be deeply appreciated by the wellers in that crowded section.

HE WAS A HYPNOTIZER.

And Got Away with a Philadel phian's Fifty Dollars.

A few weeks ago, says the Pittsburg Dispatch, a weli-known Philadelphian was travelling through Georgia in an exceed ingly slow train. There was only two other passengers in that car, and with one of these the Quaker City man engaged in conversation. After a while they got talking about mind-reading and Mr. Blanke, of Philadelphia, expressed his disbelief in anything of the kind. " Maybe you don't take any stock in

"Now," said the young man. "I can hypnotize that old fellow so he will wake up when the conductor enters, knock him down, choke him, and throw his hat out of the window."

"I'll bet \$50 to \$15 that you can't!" exclaimed the incredulous Philadelphian. The wager was accepted, the money was deposited with the solitary brakeman, and then the hypnotzer crept softly up to the sleeping passenger, waving his hands over the latter's head and whispering the projec inst uctions. Then he took his seat beside Mr. Blanke.

In a quarter of an hour the conductor entered the car and sung out." Tickets!"
The next second the elderly passenger awoke with a start and leaped into the last should wasting, an instanth esized him by the throat and before Mr. Blanke or the brakeman could come to the rescue the conductor's hat was picked up and thrown out of an open window.
